

*First day at University Geomed*

On September 25, at university Geomed held a meeting with first-year students of the Faculty of Dentistry, Health Economics and Management, Physical Medicine and Rehabilitation. The deans of the faculties, the head of the quality assurance service, the Depute of the library, and the professors addressed the students. Students received important

information about the specifics of the programs, the main components, and methods of the learning process and library services.

A graduation farewell party was held at Sheraton Grand Tbilisi Metechi Palace. Another stream of students of the one-level educational English-language program of the Faculty of Medicine completed their studies. The event was opened by the Rector of the University Geomed, Professor Marina Pirtskhalava. She welcomed and congratulated graduates on this remarkable day. Professors, dean of the faculty of Medicine and head of the program also congratulated the graduates. Students were awarded certificates.

The ceremony ended with the throwing of hats and the taking of memorable photos.

In Tbilisi, Georgia held the 7th International Conference “Viruses of Microbes“. Among the scientists invited from 54 countries was Swarali Chodnekar, a 4th year student of the University Geomed Faculty of Medicine.

Swarali presented a poster titled “Clinical Report of Novel Therapy with bacteriophages“. In the poster presentation, she discussed the process of isolation and clinical usage of novel bacteriophage therapy for Pan-drug resistant infections and also presented an associated case report. She clearly and interestingly explained her research work and demonstrated her knowledge and skills.

Research gained a lot of interest among the conference participants. Her presentation generated a lot of interest among the conference participants, especially from virology experts. During the research work, her supervisors were

professors – Professor Khatuna Makalatia, Nino Grdzlishvili and Natia Karumidze.

Round tables, discussions, awards, and various social activities were held in the scope of the conference.

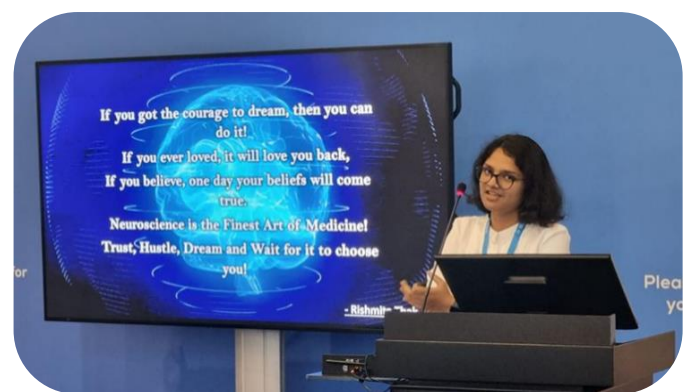

The 9th International Congress of the European Academy of Neurologists was held in Budapest, where Rishmita Sachin Thakur, a 4th-year student of the Faculty of Medicine, was invited from University Geomed. She presented a topic on "Why Neurology", which won first place. The presentation generated great interest among the attendees.

Lectures, seminars, case-based discussions, etc. were held in the scope of the congress.

“It was an honor to present my understanding of the human body's most ”Intricate Organ' amidst a brilliant community that shared my enthusiasm, love, and dedication for this subject. Apart from receiving an important educational opportunity, it was nice to meet some of my idols and make some professional and personal contacts.

My experience was fantastic, and I would encourage my colleagues to do the same! I believe that we frequently have scientific interests that extend outside our university curricula, compelling us to seek out external chances like these that would allow us to reinforce, build, and redesign our foundations in science“.

*Rishmita Sachin Thakur – 4<sup>th</sup> year student of Faculty of Medicine*

The doctors of the University Geomedi Dental Clinic participated in the 4th international exhibition in Batumi, called "Expo Batumi 2023". 60th local and foreign medical institutions were presented at the exhibition. They discussed Current health problems of our time, the issues of treatment of specific clinical cases with the latest methods, talked about modern equipment and innovations.

"It is necessary for a doctor involved in clinical activity to develop and update his knowledge, especially if he has to convey information about current news to students. I think that such meetings are very useful and important, because this give us opportunity to learn about news, contribute to interesting discussions among colleagues and find ways to solve problems in the best ways.

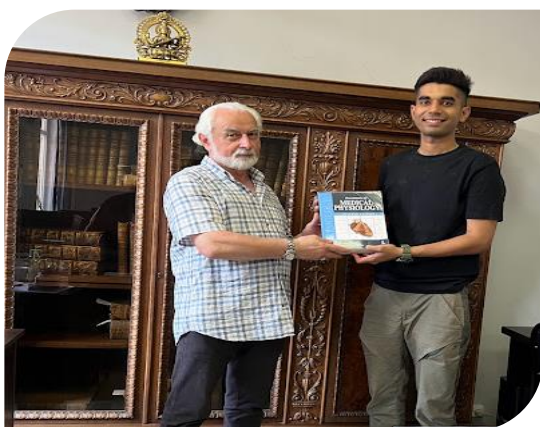

The administration of University Geomedi constantly ensures the professional development of the team of doctors, for which we are deeply grateful to the rector, Mrs.

Marina Firtskhalava. That is why the clinic is staffed by highly competent doctors, which allows the treatment of patients to be painless, less stressful, and safe."

**Giorgi Modebadze - Chief Doctor of University Dental Clinic**

A lecture and master class in endodontics on "Modern aspects of endodontic treatment" was held for residents at the University Dental Clinic. This meeting was devoted to modern approaches to endodontic treatment, current issues, and ways to rationally solve their treatment. Nino Japaridze - associate professor, official speaker, and trainer of "Ivoclar" company in Georgia, head of the program of the Faculty of Dentistry at University Geomedi conducted the lecture. An interesting discussion took place after the lecture.

Hitarth Nirenbhai Vaidya, a graduate of the one-step educational program of Medicine donated English books to the library.

„My experience with the university library was amazing. I have been going here for six years, and the environment is great. The library staff are friendly, do their job well, and try to develop the library. I will truly miss it and will cherish these memories forever.

Good luck to each student and the University Geomedi.”

**Hitarth Nirenbhai Vaidya- a graduate of Faculty of Medicine**

In the conference hall of University Geomedi held scientific seminars on the following issues:

"Use of some plants common in Georgia, including endemic species, in folk and clinical medicine". Mariam Kobiashvili spoke about the distribution of some plants in Georgia and the use of their healing potential, both in folk and

clinical medicine.

"Chemical composition of common medicinal plants in Georgia and their functions". The speaker was Tornike Mindiashvili. He discussed the main chemical substances in the composition of some plants in Georgia, the medicinal properties of these substances, and their participation in the physiological processes of plants.

University professors and students attended the seminars.
