# გეომედი Geomedi

№23 (24) 2026 University Geomedi Quarterly Newspaper

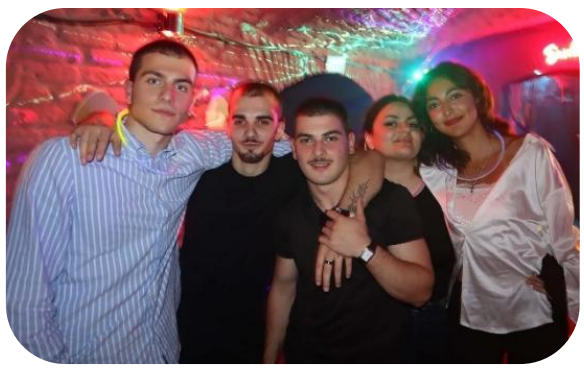

On October 4, a closed Welcome Party was held at the Bar "Sardaf", organized by the student self-government of University Geomedi, dedicated to the start of the new academic year and student life.

The event gave students from different courses an opportunity to gather, get to know each other, and spend time in an environment different from the university's daily routine.

The special mood of the evening was created by the invited DJ, music, entertainment activities, and a specially arranged photo booth, where students could take memorable pictures and save their emotions.

The main purpose of the event was not only to have fun, but also to create a space where students would feel part of one big university family, establish new friendships and create pleasant memories together.

Welcome Party is another proof that student life is not limited to the academic process only - it is a combination of new relationships, shared experiences, and unforgettable moments.

Another significant step toward internationalization was the visit of a delegation from University Geomedi to Swami Vivekanand Subharti University in India.

During the visit, university representatives-Vice-Rector Professor Aleksandre Loladze and Head of the Student Relations Service Ekaterine-Madona Buadze-met with Dr. Shalya Raj, Vice-Chancellor and Executive Director of Swami Vivekanand Subharti University.

The parties discussed opportunities to strengthen and expand long-term cooperation between the two universities, for both students and academic staff. Specifically, the key areas of discussion included: creating clinical and educational exchange program opportunities for students of the Faculty of Medicine; fostering collaboration between academic and administrative staff; and organizing joint international conferences, scientific meetings, seminars, and workshops. Developing opportunities for cooperation in postgraduate and continuing medical education, etc.

The visit to Swami Vivekanand Subharti University was significant for University Geomedi, as it will further expand global academic partnerships and create additional educational, scientific, and professional opportunities for students and the academic community.

The MedLink Society successfully hosted “The Doctor’s Blueprint,” an interactive online session designed to guide medical students through FMGE preparation with practical advice and real-life experiences from young doctors.

The session featured Dr. Ritika Bhatia, an intern at Civil Hospital and Founder and Former President of MedLink Society, alongside Dr. Saket Gaur, an intern and medical content creator.

The speakers shared effective preparation strategies, essential learning resources, and common mistakes. Special emphasis was placed on managing exam-day logistics and techniques for handling stress alongside demanding academic responsibilities.

A key highlight was the speakers’ personal five-step blueprint for FMGE success, followed by an engaging question-and-answer segment that allowed students to seek guidance and clarify their doubts.

Through initiatives like The Doctor’s Blueprint, MedLink Society continues to encourage peer learning, mentorship, and practical knowledge-sharing, helping students approach their academic and professional journeys with greater clarity and confidence.

The student self-government of University Geomedi organized an intellectual game "What? Where? When?", in which students from various faculties participated. The game unfolded amidst engaging questions and discussions, in an atmosphere that was both friendly and competitive. The competition served as an opportunity to showcase knowledge, logical thinking, and teamwork. The winner was the medicine faculty team.

The goal of the event was to promote intellectual activities among students and to add variety to university life.

GRACE, in collaboration with Caritas Georgia, organised a Winter Clothes Donation Drive at University Geomedi to support individuals and families in need during the winter season. The initiative encouraged students and members of the university community to donate essential winter clothing, including jackets, sweaters, blankets, scarves, gloves, etc. The collected donations were intended to be handed over to Caritas Georgia for sorting and distribution to beneficiaries through its charitable programmes.

The initiative aimed to promote compassion, community participation and social responsibility while providing practical support to vulnerable individuals during the colder months.

Alexandre Loladze, MD, PhD, Vice-Rector for Administrative Affairs at University Geomedi, participated as an expert speaker at Geoanesthesia 2026, the Ninth International Anesthesiology and Intensive Care Conference. The prestigious global forum took place at the Sheraton Batumi Hotel. Organized by the Society of Anesthesiologists and Reanimatologists of Georgia and held under the patronage of the Government of Adjara.

The 2026 iteration of the conference was dedicated to the complex challenges of sepsis diagnostic and management. Representing University Geomedi, Dr. Loladze delivered a significant clinical and scientific presentation entitled “Burn-induced sepsis: early recognition and the role of modern markers.” His report contributed valuable insights into contemporary diagnostic protocols and modern biomarkers essential for the timely identification and management of sepsis in burn patients.

On October 14, the Student Self-Government organized an excursion for students to the Chiatura region. During the trip, participants visited notable local landmarks, including the Katskhi Pillar, the Samtvera Waterfall, and the Monastery of the Nativity of the Savior. The excursion offered students an opportunity to explore Georgia’s cultural and natural heritage, share their impressions, and strengthen their relationships outside the university environment.

Such activities help enrich student life, foster communication among young people, and create shared, unforgettable memories. The GeoMed Student Self-Government plans to continue organizing a diverse range of educational, cultural, and recreational events for students in the future.

In connection with the International Breast Cancer Awareness Month in October, an event was held by the University Geomed student club GRACE.

The event was held in cooperation with GIMSOC (Georgian International Medical Student Society) as part of MedCon '26 and aimed to raise awareness about breast cancer and support activities related to the care of cancer patients. The evening was filled with fun and creative activities, games, music, and prizes.

On October 17 and 18, an event was held at University Geomedi to celebrate the Navratri festival, bringing students together to enjoy the festive atmosphere, cultural activities, and traditional celebrations. The event provided an opportunity for everyone to celebrate the spirit of Navratri and enjoy the festivities.

Navaratri, which means “nine nights,” is a festival that has been observed for centuries throughout India. Navratri is dedicated to the worship of the goddess Durga and her nine forms, each symbolizing different qualities such as strength, wisdom, courage, devotion, and protection. During nine days, people pray, fast, and participate in traditional music and dance.
